BENEFITS OF COMPOSTING

01 Recycles food scraps generated at home, resourcefully.

02 Reduces powerful greenhouse gases emission.

03 Produces high-quality compost for your plants.

04 Requires minimal effort, equipment, and expertise.

05 Saves money and makes getting your hands a little dirty fun!
THE WHERE, WHEN, & HOW...

...AT HOME, RIGHT NOW!

COMPOSTING
nature’s way of recycling

THE ESSENTIALS

Carbon-rich materials ("browns")
- dry leaves, plant stalks, and twigs
- Nitrogen-rich materials ("greens")
